

Environmental Policy Statement

As a global leader in hi-tech, renewable energy, Greatcell Solar has a deep awareness of the importance of making its footprint on the world and in society one that is positive from an environmental perspective. The Company is highly innovative and responsible in seeking new ways to produce materials that reduce input use, energy use and waste.

This policy relates to how all operations in the Company will be continually reviewed and improved, so that we will truly be able to integrate environmental and social considerations into our everyday work practices.

The company will consistently encourage participation and train employees in environmental matters.

The Greatcell Solar Executive is committed to implementing this Environmental Policy and is responsible for direction setting, decision making and reviewing reports on environmental performance.

Greatcell Solar's environmental management policy is based on international and domestic legislation, policies and standards, including:

- Greatcell Solar's Sustainability Report 2017;
- The National Waste Policy – Australian Government, Department of the Environment, Water, Heritage and the Arts;
- Environmental Protection and Biodiversity Conservation Act 1999;
- AS/NZS ISO 14001:2015 Environmental Management Systems;
- The Australian Government's Sustainability Procurement Guide 2013.

To deliver the intent of this policy, we commit to the following principles and practices:

- Comply with all laws governing the environment, and actively look for ways to improve on these guidelines;
- Work towards the conservation of energy, water and resources in all our operations;
- Strive to better understand both the direct and indirect impact that our practices may have on the environment;
- Promote environmental awareness throughout all operations of the company;
- Provide training/newsletters/posters to staff on implementing our sustainable policies;
- Dispose of waste thoughtfully, and develop an attitude of "reducing, recycling and reusing";
- Lessen our environmental impact by purchasing environmentally-friendly products and services;
- Work with our entire supply chain in order to gain mutual benefits of incorporating environmentally sustainable goals into everyday business;
- Regularly review our business practices, and determine whether each practice is suitable in an environmental context.
